

VLE is Undead!

Wednesday 16 December 2009

University of Wolverhampton, Millennium City Building,
Wulfruna Street, Wolverhampton, WV1 1SB

The future success of e-learning depends on appropriate selection of tools and services. This symposium will propose that the Virtual Learning Environment (VLE) as an institutional tool is dead, no more, defunct, expired.

Originally delivered at ALTC 2009, this discussion has since moved forward, opinions have changed, divided and developed so it could now be argued that VLEs are undead - an entity which was once alive, has since died but continued to carry some life like characteristics.

This lively debate is designed to give end-users a voice and an opportunity to discuss the issues that arise by using institutional VLEs.

DRAFT PROGRAMME

- | | |
|--------------|---|
